SUMMARY

Front-End Developer who turns designs into fast, responsive React interfaces that score **95+ on Lighthouse** — and who is comfortable across the stack, having built **full-stack RAG assistants on Claude** with Python/FastAPI. **Meta Front-End certified**; 4 years of industrial quality-control precision now applied to clean, component-driven code. Seeking a junior front-end role — on-site or remote — to ship real user value.

PROJECTS

ShopEase — React E-Commerce Storefront 2025

[Live Demo](#) · [Source](#)

- Built reusable, **accessible components** (keyboard-navigable, ARIA-labeled); **95+ Lighthouse** on mobile.
 - Global cart state with **React hooks & Context API**; instant client-side search across 20+ products.
- Stack:** *React · JavaScript · React Router · Context API · Tailwind CSS · REST API*

SkyCast — React Weather Dashboard 2025

[Live Demo](#) · [Source](#)

- Integrated a third-party **REST API** with debounced search, cutting redundant calls by **~70%**.
 - Handled loading, empty and error states gracefully for a smooth mobile-first experience.
- Stack:** *React · JavaScript · Fetch API · CSS · Responsive Design*

Doc Q&A Assistant — RAG with Source Citations 2026

- Full-stack **RAG** app: upload PDF/DOCX/MD and ask questions; answers grounded in the docs with **inline page citations**.
 - Built the **React** UI and a **FastAPI** backend (embeddings + vector search + grounded **Claude** prompting) that replies "I don't know" instead of hallucinating.
- Stack:** *React · Python · FastAPI · Claude · sentence-transformers · vector search · REST*

Codebase Assistant — Code-Aware RAG 2026

- Ask a repository questions in plain English and get explanations that **cite exact file/line ranges**.
 - Code-aware chunking on function/class boundaries for higher retrieval precision; React frontend over a FastAPI API.
- Stack:** *React · Python · FastAPI · Claude · vector search · REST*

EXPERIENCE

Quality Control Operator 2021 — 2025

Yazaki — Automotive Wire-Harness Manufacturing, Morocco

- Inspected high-volume production lines for conformity and defects under strict automotive quality standards.
- Logged and analyzed quality metrics under tight cycle times — the eye for detail now applied to code review and testing.

EDUCATION

Specialized Technician in Software Development 2024 — 2026

IPIAB — Kénitra, Morocco

Web development, databases, OOP and information systems.

High School Diploma (Baccalaureate) 2019

Morocco

SKILLS

FRONT-END

- React
- JavaScript (ES6+)
- HTML5
- CSS3
- Responsive Design
- Accessibility (a11y)
- TypeScript (basics)

STYLING & UI

- Tailwind CSS
- Bootstrap
- Figma

BACK-END & AI

- Python
- FastAPI
- RAG / LLM (Claude)
- Vector search
- Java
- Spring Boot
- REST APIs
- SQL / PostgreSQL

TOOLS

- Git / GitHub
- npm
- Postman
- VS Code
- Agile

CURRENTLY LEARNING

- Next.js
- Redux Toolkit
- Jest
- Testing Library

LANGUAGES

Arabic	Native
English	Fluent · C1
French	Intermediate · B1

CERTIFICATIONS

Meta Front-End Development
